

The Rise of the 4th Platform: Pervasive Community, Data, Devices, and Intelligence

This document explains about the revolution of new technology – (Internet of Things/ Platform 4), relationship between new technology and business, and the necessity of understanding new technology. It also describes that man-machine technology is going to be disappeared and it is going to rise up a new platform soon, but still there would be a connection between 4th platform and 3rd platform. When it comes to business, organizations need to prepare for the digital transformation. Understanding the value of new technology in business bring lots of benefits to the organization. The knowledge is the key point that needs to be considered before transforming a system into a new platform.

IoT platform wars: The battle for the 4th enterprise platform

This document has two parts. First the connection between the IoT and the other platforms and second the revolution of IoT through the other platforms. It is mentioned that though there are several challenges for IoT from other technologies such as web, database, mobile and cloud, the revolution of IoT can be seen through the different kind of evaluation categories with succeeded examples.

The roles of cloud computing and fog computing int the internet of things revolution

The article is about Internet of things (IoT) and Cloud Computing (CC). It has explained what is Internet of things, uses of it, Relationship between Iot and CC, uses of CC and Fog Computing.

Roles of CC & FC in the IoT revolution	CC Vs IoT	Role of CC in IoT	Fog Computing
Internet of things	Cloud Computing & uses	Relationship between CC and IoT	Explanation of FC
Outcome of Internet of things	Categorization of Cloud as per the function	Use of IoT and CC	Use of FC
Finding for a solution of IoT	Internet of Things	Use of IoT and CC	Forecast about FC Usage
Difference between Cloud computing and IoT	Use of Internet of Things	Popular IoT cloud Platform	Use of FC
Cloud Vs IoT	Relationship between CC and IoT		
Role of cloud computing in IoT			
Fog computing			

Internet of things	Outcome of Internet of things
	Finding for a solution of IoT
	Use of Internet of Things
